Spa Beach Garden

It's important to recall that our outdoors venues require lightning, we have an external provider that has the perfect option for you, the cost for each line is \$220+tax. On the first documents we send with pictures of the venues it shows that all our outdoor venues don't count with lights. The string lines is our recommendation for the outdoors venue, this kind of lights goes perfect with the ambience of this area, we can provide you with the house lighting if you don't want to rent the string lines, please keep in mind that the house lighting is something like the following:

This type of light would be good for the area but the atmosphere that provides the string light is different, that's why recommended this to you. Also, since we have a deal with our supplier this is the most economic option of lights (the string lines) the \$220 per line already includes transportation and set up & strike, any other lighting like LED lights or up lights would need to add this fees in top of the price, let us know what do you want to do in terms of lighting.
